## 9 BLOCK THERAPY

## 9 Block Therapy

Our special body shape and wellness program called "9 Block Therapy" allows users to set their own body shape goals through the app and receive personalized nutrition plans and exercise regimens from us.

The purpose of the products is to help users lead a healthy life by continuously tracking their body and measurements and confirming improvements so that they can maintain a sustainable usability and challenge, rather than a one-off.

## The science behind Bello & Fitto

Near-infrared technology behind Bello & Fitto measures lipid, water, oxygenated and deoxygenated hemoglobin. Our device can directly quantify body components underneath the skin and provide the most accurate measurement, anytime, anywhere.

### Tissue Absorption

Soft tissues of the human body are mostly made out of hemoglobin, water, and fat, and these components have different absorption properties.

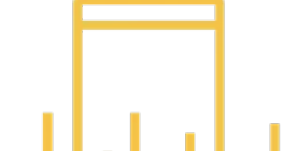

### Infrared Detection

DMW-NIRS (Discrete Multi-Wavelengths Near-Infrared Spectroscopy) has multiple near infrared wavelengths that scan soft tissues and detect reflectance signals.

### Signal Analysis

By analyzing the reflectance signals, we calculate fat/muscle density from the area of the body scanned.

### Precision Reports

Density information is then sent to the app which various indexes and provides precision reports about your body.
